- REACT
- NODE
- EXPRESS
- MONGODB

PROJECTS

Urban grocer

UrbanGrocer is an online platform that simplifies grocery shopping by offering a seamless experience to browse, purchase, and schedule delivery of fresh groceries. Users can explore a diverse product catalog with intuitive search and filter options, manage orders via a shopping cart, and track purchases through personalized accounts. The platform ensures secure payments, delivery scheduling, and real-time order updates via email or SMS. For administrators, an efficient panel manages products, inventory, and orders. Designed with a responsive layout, UrbanGrocer prioritizes convenience, efficiency, and user satisfaction, delivering fresh groceries directly to your doorstep. (React, Bootstrap, Node, Express, and mongoDB)
